Aadit U. Talele

331206 Georgia Tech Station Atlanta, GA 30332 | 404-490-2377 | atalele@gatech.edu | U.S. Citizen

Objective

Seeking a software engineering internship where I can contribute strong programming, problem-solving, and systems fundamentals to building scalable, user-focused software. Interested in backend development, full-stack applications, and performance-oriented engineering, with availability beginning May 2027.

Education

Georgia Institute of Technology | Atlanta, GA *August 2026 – Present*
Bachelor of Science in Computer Engineering, GPA 3.85 Expected Graduation, May 2029

Lambert High School | Suwanee, GA *August 2022 – May 2026*

Skills

Programming: Python, TypeScript, JavaScript, Node.js, Java
Frameworks: FastAPI, Express, React, Redis, MongoDB, Next.js, PostgreSQL
Platforms: AWS, Snowflake
Software: GitHub, Postman, VS Code
Communication: Technical Documentation, Presentations, Code Reviews
Languages: English (fluent), Spanish (beginner)

Experience

BuildingU | Remote *May – August 2026*
Software Developer Intern
An open-access EdTech platform and digital learning ecosystem that delivers career-readiness resources to students.

- Developed 10+ REST API endpoints using TypeScript and Express to support profile-driven matching and resource discovery.
- Built validation, transformation, and synchronization logic for opportunity listings.
- Collaborated in Agile sprints and contributed to peer code reviews using Git.

Projects

ComLab | Hackathon Project *Spring 2026*
Software Developer
An individual hackathon project that was built to simplify bug and feature reporting for non-technical users while helping product teams identify and prioritize actionable feedback.

- Built a full-stack app with Next.js, TypeScript, and MongoDB to streamline bug and feature reporting for non-technical users.
- Integrated Snowflake Cortex AI to automate ticket triaging and analyze user feedback.
- Implemented ticket sorting and a community upvoting system to surface top user requests.
- Won Best Use of Snowflake API at MLH's Hacks for Hackers.

Relevant Coursework

Data Structures and Algorithms: Design, implementation, and analysis of fundamental data structures and algorithms; linked lists, stacks, queues, trees, heaps, hash tables, and graphs; sorting, searching, recursion, and algorithmic complexity
Introduction to Object-Oriented Programming with Java: Object-oriented programming principles and software development in Java; classes, objects, inheritance, polymorphism, interfaces, and exception handling; debugging and code organization
Digital System Design: Computer system and digital design principles; switch and gate design, Boolean algebra, number systems, arithmetic, and storage elements; datapath design, memory organization, instruction set architecture, and assembly language
Linear Algebra: Eigenvalues & Eigenvectors; Matrix Methods & Linear Systems; Least Squares & Diagonalization
Multivariable Calculus: Partial Derivatives & Multivariable Optimization; Multiple Integration; Vector Calculus

Activities

Lambert High School Computer Science Club | Officer *September 2024 – May 2026*

- Collaborated with club leadership to organize and lead workshops on web development and algorithmic programming for 50+ members.
- Developed and maintained the club's website using Next.js and React.
